Acknowledgement

Receipt is acknowledged of the Amendment filed February 23, 2004.

Reasons for Allowance

Claims 1 and 17-20 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Giles et al., taken alone or in combination of other references, does not teach or fairly suggest a storage circuit comprising, among other things, a storage circuit, having a first output and a second output, outputs the third signal directly to the first output, and the output signal of the second logic gate through the second output (claim 1); a second logic gate which is coupled to the output of the master latch, the output signal of the master latch being received by the second logic gate without passing through the slave latch, and the second logic gate outputting the output signal of the master latch to the second output of the storage circuit in response to the control signal (claim 17); a second logic gate for receiving the third signal from the first storage element, said second logic gate fixing an output signal thereof, regardless of the received third signal, in response to a second control signal which is supplied independently of the first control signal (claim 18); and a logic circuit for receiving an output signal of the first output terminal of the first storage circuit, for performing a predetermined processing on the output signal, and for outputting a result of the processing; and a second storage circuit including third and fourth input terminals, and a second control terminal for receiving the control signal (claim 20), as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
